EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. The application has been amended as follows:

In the Abstract :

*** The Abstract has been amended as follow,**

-- An object of the invention is to provide a receiving circuit where the quality of reception can be prevented from deteriorating when the gain changes, so that the good quality of the received signal can be preserved, as well as a receiving apparatus and a transmitting/receiving apparatus using the receiving circuit. In the configuration of the invention, a switch (113) is converted to a short state in response to a change in the gain of a variable gain amplifier (107) by means of a gain control apparatus 112, and thereby, the output terminal of a high pass filter (111) is fixed at a reference voltage and the cutoff frequency of a low pass filter (108) is increased. As a result, the period during which the DC voltage has transient response properties in the low pass filter (108) can be shortened, and this transient response prevented from passing through the high pass filter (111). --

REASON FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance:

The instant application is directed to a non-obvious feature implementation over the invention described in cited prior art, particularly to **Matsumoto** et al (US

7,171,185), **Vepsalainen** et al (US 7,139,542) and **Mohindra** (US 7,110,734). The non-obvious feature comprises a switch, a low pass filter and a high pass filter as recited in independent claim 9, which are controlled by a gain control apparatus that controls said switch, and thereby, fixes the output of said high pass filter at a reference voltage for a constant period of time, and in addition, controls said low pass filter, and thereby, makes the cutoff frequency of said low pass filter higher than the original cutoff frequency for a constant period of time.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Information Disclosure Statement

4. The references listed in the information disclosure statements submitted on 9/5/06 has been considered by the examiner (see attached PTO-1449).

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

See the attached PTO-892.

6. Any response to this action should be mailed to:

Commissioner of Patents and Trademarks
Washington, D.C. 20231

or faxed to:

(571) 273-8300 (for **formal** communications intended for entry)

(571)-273-7893 (for informal or **draft** communications).

Hand-delivered responses should be brought to Customer Service Window,
